EDUCATION

Visvesvaraya Technological University
Bachelor of Engineering in Computer Science

Karnataka, India
June 2012

KEY SKILLS

- Having 5+ years of professional experience in development of various projects using Java/J2EE and its related technologies
- Participate in whole software development lifecycle -from analyzing the requirements together with our Products leads,the definition of the target architecture and development up until the operation on openshift
- Excellent analytical skills,an agile mindset - curious and a step ahead when it comes to software trends
- Build the core content creation system in a Restful microservices architecture
- Having good knowledge on design pattern like Singleton,DAO and MVC
- Experience in development of object-oriented business applications using Core Java,JDBC,Servlet,JSP, Struts,Spring,Hibernate and NodeJs
- Experience in developing the Web Applications using Apache tomcat and Weblogic Server
- Experience in developing report using Jasper Report
- Hands-on experience in Blockchain platform such as Ethereum and Stellar
- PoC on Blockchain like KYC, Supply Chain, Trade Finance, Media and entertainment, travel insurance etc
- Very well versed with IDE's like Eclipse, Net Beans
- Very well versed with tools like SVN, Log4j, iReport Git
- Good team member, positive attitude and quick learner, willing to adapt new challenges and technologies (Blockchain,Microservices,RabbitMq,Nodejs,SpringBoot,Hibernate, Struts,Spring WebServices)

PROJECTS

Project 1 - Stacker

July 2018 - Present

- The Stacker is a micropayment application based on a blockchain.Media house Integrated with Stacker to make its content(article,image,video) as a paid .Stacker provide single account on blockchain and dashboard to access all the content which is buy by end user.
- Programming Languages: Javascript,Typescript,HTML,CSS
- Framework :NodeJs,ReactJs
- IDE and Software : VSCode,RabbitMq,JIRA,GIT
- Environment : UBUNTU 14,VDI
- Role : Developer

Project 2 - Psyllium Supply Chain

Oct 2017 – July 2018

- The system will store information on a blockchain, and parties that handle the highest amount of information will be running their own node on the network. Blockchain will enable PG to maintain an immutable audit trail of information that will allow it to track the source of each batch of psyllium
- Programming Languages: JAVA, Javascript, AJAX, Solidity
- Framework : NodeJs, SpringBoot, Spring Batch
- IDE and Software : VSCode, Eclipse, JIRA, GIT
- Environment : UBUNTU 14
- Role : Developer

Project 3 -CVS(Capital Value System)

March 2015 – Nov 2016

- This Software is being developed for Municipal Corporation of Greater Mumbai (MCGM). This is upgradation of existing PTIS application due to change in Business Rule. Assessment will be change based on factor of Capital Value instead of Ratable Value of Property. Citizen will be able to enter his/her property details through portal for assessment. The Special Notice and Bills would get generate depends on Capital Value and then dispatch to the citizen. Once the bill dispatched to the Property Owner, Payment can be collected from the Customer Facilitation Center (CFC) at multiple ward Location. Software contains different modules like OSM, Assessment, Objection, Billing, Collection, Special Notice, Payment Gateway etc.
- Programming Languages: JAVA, Javascript, AJAX
- Framework : Struts, Hibernate
- IDE and Software : Netbean, Eclipse, JIRA, SVN
- Environment : Windows7
- Role : Developer
